SAVE FOR FUTURE USE

1 INSTALL DIVERTER **CAUTION** Turn off water at main supply.

- When finished tiling the wall, remove PLASTER GUARD (1). Remove two screws that secure the DIVERTER LID (2) and remove Lid. Inspect the inside surface of diverter port. Diverter port must be free of any dirt. Clean if necessary.
- Install DIVERTER (3) with SCREWS (4) removed from DIVERTER LID (2).
- Operate DIVERTER (3). DIVERTER (3) should slide in and out smoothly.

2 INSTALL DIVERTER COVER AND VALVE COVER

- Push CAP (1) over VALVE CARTRIDGE (2) until seated against stop. Push CAP (3) over DIVERTER (4) until seated against stop.

3 INSTALL TRIM **CAUTION** Protect finish on SHOWER ARM, SHOWER HEAD and TUB SPOUT when installing.

- Mount ESCUTCHEON HOLDER (1) with gasket to fitting using two LONG SCREWS (2). Push the ESCUTCHEON COVER (3) over CAP (4). Align screw holes in ESCUTCHEON COVER (3) with holes in ESCUTCHEON HOLDER (1). Fasten with three MOUNTING SCREWS (5).
- Push ADAPTER (6) onto CARTRIDGE STEM (7) and secure with WASHER and SCREW (8).
- Push DIAL PLATE (9) onto CAP (4) flush against ESCUTCHEON COVER (3) with the "OFF" facing down.
- Install HANDLE ASSEMBLY (10) onto ADAPTER (6) with LEVER (11) in the down position. Turn LEVER (11) clockwise to off position. Pull HANDLE ASSEMBLY (10) off and align again to down position. Thread HANDLE BASE (12) clockwise onto ADAPTER (6) to secure handle to valve. Thread DIVERTER KNOB (13) clockwise onto diverter stem.

4 ADJUST HOT LIMIT STOP (MUST BE DONE PRIOR TO TRIM INSTALLATION)

By restricting **HANDLE** rotation and limiting the amount of hot water allowed to mix with the cold, the **HOT LIMIT SAFETY STOP (1)** reduces risk of accidental scalding. To set the maximum hot water temperature of your faucet, all you need to do is adjust the setting on the **HOT LIMIT SAFETY STOP (1)**.

- Turn **CARTRIDGE STEM (2)** to the OFF position (coldest setting) before making adjustment to **HOT LIMIT STOP (1)**. Use a flat blade screwdriver to pry free the **HOT LIMIT SAFETY STOP (1)**. Pull forward and rotate counterclockwise one number to limit hot water temperature. Use **ARROW (3)** on **CARTRIDGE (4)** and **NUMBERS (5)** on **HOT LIMIT STOP (1)** for indication.

5 TEST INSTALLED FAUCET

- Turn **VALVE "off"**.
- With **HANDLE** in "off" position, turn on water supplies and check all connections for leaks.
- Operate **HANDLE** and flush water lines thoroughly. Pull **DIVERTER** and check **SHOWER** for proper operation.
- Check **SPOUT** and **SHOWER** connections for leaks.
