Installation Instructions:

1. Remove existing tank lever.
2. Remove the brass arm mechanism from the new tank lever by loosening screw A.
3. Position the new tank lever through the tank hole. The tank lever handle should be pointing away from the toilet bowl.
4. Install the brass nut inside the tank and tighten. Depending on the curvature of the tank, there might be a slight gap between the outside of the tank and the base of the lever.
5. Loosen, but do not remove screw on the arm mechanism.
6. Tighten screw A.
7. Adjust the brass arm mechanism so it does not come in contact with the tank wall or any part of the flush mechanism parts inside the tank.
8. Tighten the adjustment screw (screw B) on the brass arm mechanism
9. Attach the flapper valve chain to one of the three holes provided slots on the brass arm.
10. Make sure that the arm does not activate, and no water is leaking through the flapper valve when the handle is in its normal position, (not flushing).

Cleaning Instructions:

To preserve the fine finish of this product, clean only with a soft damp cloth. Dry well. Do not use commercial or abrasive cleaners.
