### Vanity Installation

#### Two people recommended for this installation

Mount the drain assembly (not included) on the sink. Be certain to apply a bead of sealing putty on the underside of the drain (Part "A") in order to ensure a watertight seal between the sink and drain. Remove excess putty after installing the drain on the sink.

Apply a bead of silicone adhesive to the rim of the vanity. Place the top centered left to right on the vanity and with the back edge of the top even with the rear of the vanity. Apply a bead of silicone along the top back edge of the vanity top and the wall. Clean up any excess silicone.

Connect the trap to the drain assembly hand tight to check alignment. It may be necessary to cut off part of the tailpiece (area "B") or part horizontal leg of the trap (area "C").

Connect hot and cold supply lines to the shut off valves. Tighten trap joints for watertight assembly.

### CARE AND CLEANING

When cleaning your vanity top, wash it with mild, soapy water, rinse thoroughly with clear water and dry with a soft cloth. Avoid abrasive detergents, disinfectants, or cleaning products in aerosol cans.
