SARISHOWER

Example of installation. Follow local plumbing codes for actual install

The **Sanishower drain pump** is used to pump gray water away from a variety of fixtures in **residential applications**.

The system is able to discharge the waste up to **12 feet vertical and/or 100 feet horizontal**.

- Discharges the waste through a 34" or 1" rigid pipe. A non-return valve is included on the discharge fitting assembly provided with the system. Unlike the other models, the discharge for this model is on the side of the enclosure.
- Has been designed to be **vented through a 1½" or 1½" pipe**. The vent output is located on the top of the pump. The case has a knockout which along with the rubber adapter provided is used to connect to the vent pipe. Note: The use of mechanical vents, air admittance valves or similar devices is not permitted.
- Discharges gray water from a shower or sink. The gray water will drain into the system via two 2" inlets (with built-in check valves) on either side of the housing.

TECHNICAL SPECIFICATIONS

Pump type: Drain pump

Electrical: 120 V – 60 Hz / 5.5 Amps (Max)

Motor: 0.2 HP oil-filled thermally protected motor

Capacitor rating: 25 microfarad

Operating Temperature: 104°F (110°F Max.)

Power cord length: 48 1/2 inches

Noise level: ≤ 44 dBA (Lp) (measured at 3 ft.)

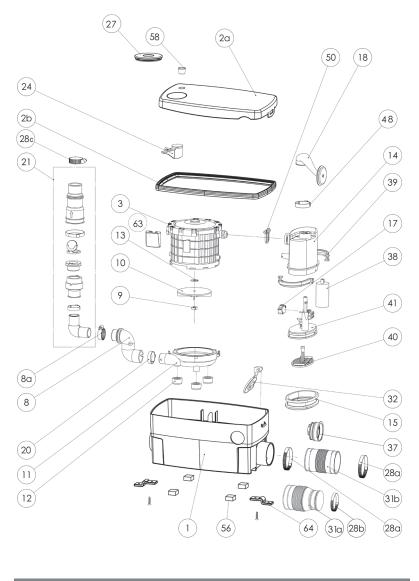

Medium

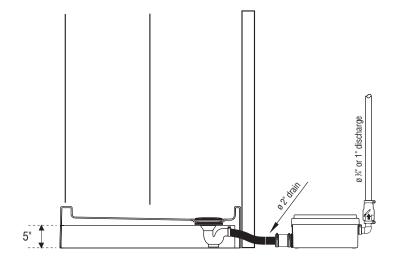

Discharge pipe diameter: 3/4" or 1" Discharge rate at 12 ft: 14 GPM Discharge rate at 3 ft: 20 GPM Shut-off head: 26 ft. Normal running time: 3-5 seconds (short bursts) Capacity: 0.9 gallons Inlets: 2" (side) Method of activation: Membrane/microswitch Shower base height: 5" min. Weight: 12 lbs. Certifying agencies: CSA (IPC, NSPC) Recommended accessories: Descaler Connections: Sink, shower 137/8" 534" 57/8"

Flow Rate (gallons/min)
