1 COMFORT 10-16 DT PM BU/LC

Note! Product picture may differ from actual product

Product No.: [99812354](#)

The high-efficiency Grundfos COMFORT 10-16 DT PM BU/LC pump are designed for recirculation of domestic hot water in single

- and two-family houses securing hot water instantly to all faucets.

The pumps have a corrosion-resistant pump housing suitable for drinking water and are powered by a single-phase, high-efficiency ECM with permanent-magnet rotor.

The integrated digital timer has been developed for domestic hot-water recirculation in systems with either hot-water tanks or plate heat exchangers for hot-water production.

The timer allows you to customise the pump's operating periods, ensuring optimal comfort while lowering energy costs.

Additionally, the pump can be set to continuous operation 100 %.

COMFORT 10-16 DT PM BU/LC has a built-in isolating valve and a non-return valve. This ensures that maintenance can be carried out without draining the system. The non-return valve also prevents reversed flow during operation.

Features and benefits:

- Continuous operation can be set for commissioning of the pump or 24 hours instant hot shower and tap water.
Quick and simple electrical installation.
Dry-running protection protects the pump against dry running during startup and normal operation.
Easy-to-clean and lime-resistant spheric rotor.
Noiseless operation due to liquid-lubricated bearing.
No leakage risk due to a static seal.
Easy maintenance and cleaning through the easy-to-separate pump head.
No additional motor protection necessary due to integrated motor electronics.
