## MIRROR INSTALLATION

**NOTE:** Mirrors are equipped to operate on a built-in, 120vac powered LED Back Light which can be wired directly behind the mirror via a switchable outlet which should be installed by an electrician before the drywall is up.

- Carefully unpack mirror, taking care not to drop or lay down on a rough surface.
- Provide suitable reinforcement required for anchoring mirror to the wall.
- Once a location is determined, use a level and tape measure to mark the mounting hole locations.

**NOTE:** Mirrors can be mounted either horizontally or vertically. (See **Diagram A and B** for dimensions)

- Mark the locations for the size and position of the mirror selected and drill a hole at these positions to accommodate the type of wall anchor used.

**NOTE:** Wall anchors must have a load capacity of at least 50lbs.

- Insert the #8 screw into the wall anchors leaving approximately 1/4" of the screw head from the wall in which to hang the mirror.
- Connect the electrical hook up to the mirror.
- Hang mirror on the screws and adjust screws in or out to ensure mirror is properly and securely mounted into the mirror's rear frame. (See **Diagram B**)

**FIGURE B**

## CARE AND CLEANING OF MIRROR

Clean the product by using soft, slightly damp cloth. Buff the mirror by using a soft dry cloth. Avoid using silicone cleaners and waxes.
